Developing and maintaining ERP and other system software for the group. Implementing and executing the software in various sister concerns of the group.

### Web Researcher

Supersoft Corporation / Mirpur, Dhaka / April, 2017 - November, 2019

Lead Generation, Data Scrapping, Web Research

## PROJECTS

### Inventory Module of ERP System

- Provides three easy continuous stages to manage the inventory control system.
- Informative dashboard (buyer, style, PO, bin information at a glance).
- Easy booking system.
- Generate barcode for every roll and cartoon in a very quick process in the pre-stage.
- Print barcode tokens with the necessary information and attached them with items when the item arrives.
- The whole receives and issue process occurs with barcode scanning. So, there is no need for any paperwork for it.
- The recap history and inventory status are also created when a barcode scanning. Which is very time-consuming and easy.
- Style and item-wise inventory status.
- Rack summary details.
- A very attractive, informative, and outstanding live bin card system that can be accessed by scanning a QRcode attached to the bin card.
- An informative location board system with QRcode access. In the location board, anyone can visit the whole warehouse

by accessing just one URL. Which is very attractive to  
buyers.

- Providing all reports for audit purposes.
- A complete knitting factory inventory control system.

## Staff Movement System

- Staff movement software is automated with a ZK time  
machine.
- Automatically count the spent time of a staff when he  
punched.
- A live movement window in a monitor is located near the ZK  
time machine which allows the users to review the monthly  
movement record to make sure that the staff has the  
permission to go outside or not when the staff punched the  
machine.
- Monthly or any time movement reports of all staff.

## Visitor Movement System

- The visitor movement system is automated with an RFID.
- Automatically count the time a visitor passed into the  
office.
- Specific the employee whom the visitor needs to visit and  
why.

## All Type of Challan and Bill Record System

- All types of challan entry into the system.
- The challan is checked by Security, Concern Section, Audit,  
and Store step by step.
- Create a bill according to the challan/invoice.
- An audit can investigate the bill.
- An accountant can see the details to pay the bill.
- All challan reports can be shown at any time.

## IT Company Portfolio Website

- Full Dynamic Dashboard.
- User Friendly.

<https://alokitosoftware.xyz/>

## Online Course Registration System

- An advisor can create courses and semesters and add  
offered courses for the semester.
- Students can apply for registered courses.

- An advisor can approve or reject courses applied by students.
